Be sure of your target and what lies beyond it.

You are responsible for everything which a round you shoot comes in contact with. This means another big dose of situational awareness **BEFORE** you make the decision to shoot! Consider the height of your target 4' to 6' minimum and the angle at which you will shoot it. If the round would make an impact through your intended target and impact something other than a bullet safe berm, trap or safe zone then you are obligated not to take the shot. This means never point firearm at anything you can't clearly identify as a target or that would be a danger if your bullet strays, ricochets, never shoot at ground targets.

Golden Rules to Gun Safety and Handling

- Always treat the gun as loaded.
- Always keep the gun pointed in a safe direction.
- Always keep your finger straight and off the trigger until you are ready to shoot.
- Always keep the gun unloaded until you are ready to use it.
- Never point the gun at anything you don't intend to destroy.
- Be sure of your target and what is beyond it.

Follow club/ NRA rules at all time when using club ranges

Read and understand rules yes _____ initials
